

Application and Access Controls

Senario: The Cloud Dimensions team wants to limit access to Infinity device data by restricting and controlling which fields the users can update.

A. **Modify the Infinity Table Role**

Create a new role for the group supporting the infinity product:

1. Ensure that you are logged in as System Administrator
2. Go to: **System Security > Users and Groups > Roles**
3. Search for and open the **u_inifinity_user** role record
4. Now, create a u_inifinity_support role (**u_inifinity_support**) by selecting **New**
5. Add **“Support role for the Infinity”** in description and **submit**.
